

INDUCTION MOTORS

SUPER-MAX

PREMIUM HIGH EFFICIENCY SERIES

CSA Certified for Class I, Division 2

Group A, B, C, D, Temperature Code T3C

Application:
Constant torque 4:1
Variable torque 100:1

Horizontal

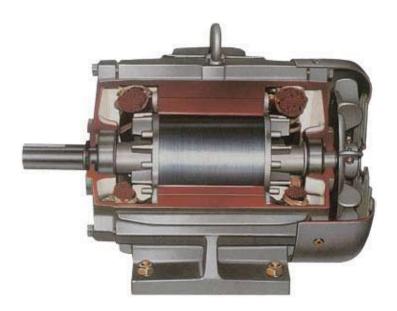

TOTALLY ENCLOSED FAN COOLED

Squirrel Cage 3-Phase Continuous Rating F Insulation

Service Factor: 1.15

3-YEAR WARRANTY

STANDARD NEMA PREMIUM® FEATURES

1.Meets or exceed NEMA premium efficiency

Premium grade low loss core steel reduces core loss. Longer core reduces core loss further by lowering operation flux densities. Larger rotor bar increase size of cross section for lowering conductor resistance and rotor copper loss.

2.Inverter Rated

Meets NEMA MG1 Part 31 at 1.0SF.,on variable frequency power CT 4:1 VT 100:1

VT 100 : 1 CH 2 : 1

3. Frame and End Brackets

Main frame and end brackets are all cast iron for superior corrosion resistance and they will better withstand the normal severe duty environment.

4. Conduit Box

Oversized conduit box made of steel fabricated provides ample space for connections. Diagonally split, rotatable in 90 degree positions which allow for conduit to be received from any direction.

5. Rotor

Die cast aluminum rotor bars with integral cast end rings and cooling fan bears better stress and vibration. Rotor and shaft assembly is dynamically balanced to assure vibration free, reliable and quiet operation.

6. Shaft Slinger

Molded neoprene or steel slinger on drive end shaft extension to prevent entrance of moisture and dust into bearing housing.

7. Bearings

Oversized, prelubricated, double shielded ball bearings are used up to 280T and oversized, regreaseable, open bearings are used for frame 320T and larger. All bearings are manufactured from vacuum degassed steels, which doubles the bearing life with minimum maintenance.

A high-quality, wide temperature range and rust in-hibiting grease, provides minimum friction losses and longer operating life. Grease pipes and relief vents with plugs are provided for all open bearing constructions.

8. Nameplate

Permanent, long life corrosion-free stainless steel nameplate complete with connection diagram.

9. More Copper In Winding

Use of more copper and larger conductors increases cross sectional area of stator windings. This lowers resistance of the windings and reduces losses due to improved current flow

All windings are treated with a minimum of 2 dips and bakes of non-hygroscopic varnish. Ensures reliable motor operation in humid, corrosive and abrasive industrial environment

10. Non-sparking Cooling Fan

Increased safety application external cooling fan meets non-sparking feature.

11. Options:

Cast iron conduit box and fan cover are available upon request.

SPECIFICATIONS

* Ratings

143T through 449T frame, 3600, 1800, 1200, 900RPM.

Continuous duty at 40°C ambient. S. F 1.15 NEMA design B

* Voltage/Frequency

3 phase, 60 Hertz. 208-230/460 volts through 100HP. 230/460 volts for 125, 150HP rating. For 200HP and larger motors, 460 volts only. 575 volts available upon request and stocked.

50 Hertz available upon request in both inch and metric frames.

* Leads

Rating	140T	UF	P TO 150HP	200HF	and Larger	320T	360T and Above	
RPM	180T	3600	1800/1200	3600	1800/1200	and Below		
Volts	230/460		230/460		460V	57	5V

D.O.L.	YES	YES	YES YES		YES	YES	YES	
Υ-Δ	N/A	YES	YES	YES	YES	N/A	YES	
Part Winding	N/A	N/A	YES (230V)	N/A	YES	N/A	N/A	

* Interchangeability

All motors are built to standardized designs, machined to limits that equal and exceed NEMA and spare parts are interchangeable.

* Dual Mounting

For frames 256T and smaller, the larger frames have 8 mounting holes to facilitate mounting into shorter frame mounting holes.

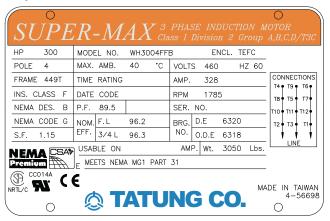

* Hardware

High strength and plated for resistance to corrosion.

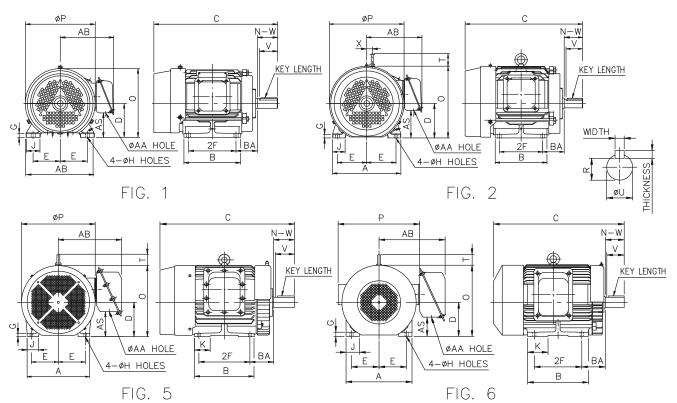

* Conversion Kits

Accepts C-FACE (143TC~449TC), D-FLANGE (143TD~449TD).

* Typical Nameplate Information
